PMM SERIES

with transverse pole pitch ,p:15m, neodymium magnets enhanced holding force

Use:

Heavy machining, such as milling and planing. The dense, concentrated magnetic field enables it to be used for small, medium and large workpieces, including those with rough or uneven surfaces. The magnetic field is without any stray fields, preventing magnetization of the tool.

Features:

Exceptionally strong neodymium magnetic system. ON-OFF control by means of hand lever. In the OFF position, a weak opposing field eases the removal of the workpiece. The magnets are equipped with longitudinal and transverse stop rails.

Laminations 3 mm brass / 12 mm steel.

Suitable for use with laminated topplates:

Nominal holding force: 150 N/cm²

Magnetic field height: 12 mm

Pole plate wearing limit: 5 mm
